

Hadi Aymen P

COMPUTER ENGINEERING STUDENT & DEVELOPER

SUMMARY

Detail-oriented and analytical Computer Science student with strong full-stack web development and artificial intelligence integration experience. Passionate about software engineering and skilled in building scalable, user-centric real-world applications using modern web technologies, robust APIs, and interactive UI/UX designs.

CONTACT:

Email:
hadiaymen22@gmail.com

Location:
Kozhikode, India

LinkedIn:
linkedin.com/in/hadiaymen

GitHub:
github.com/hadiaymen

Portfolio:
hadiaymen.vercel.app

SKILLS:

- JavaScript / TypeScript
- Python / MATLAB
- React / Node.js
- Express.js / REST APIs
- MongoDB / SQL
- Computer Vision
- Secure Authentication
- Vercel / Cloud Deploy

EDUCATION:

CUSAT (SOE)
B.Tech in Computer Engineering

2025 – Present

Kochi, Kerala

CERTIFICATIONS:

- MATLAB Certified
- Simulink Certified

EXPERIENCE:

APPLICATIONS DEVELOPER

Lekhai

github.com/hadiaymen/Lekhai

- Engineered a scalable full-stack architecture automating professional financial statement generation from uploaded documents.
- Integrated secure user authentication, interactive metrics dashboard, and automated accounting data processing workflows.
- Implemented intelligent data extraction and financial analysis using an automated custom PDF export engine layout.

SAAS PLATFORM ENGINEER

StuNet

stunet-six.vercel.app

- Developed a mobile-first SaaS networking platform with secure OTP authentication and dynamic user profile management.
- Built an optimized, real-time messaging and chat infrastructure supporting interactive community collaboration channels.
- Enhanced performance using responsive design principles and smooth micro-interactions deployed directly to Vercel production.

AI INTEGRATION LEAD

MeeCU

github.com/hadiaymen/MeeCu

- Designed an AI-integrated educational tool facilitating automated content generation and backend REST API integrations.
- Built an SEO-optimized responsive web interface featuring hardware-accelerated animations and structured GitHub workflows.

COMPUTER VISION ENGINEER

iEdgeDetector

MATLAB Application

- Programmed an interactive GUI tool with MATLAB App Designer executing Sobel, Prewitt, Roberts, and Canny edge detection algorithms.
